Feral felines Answers

To see the impact that one feral cat can have in a natural area, count the cats in the pyramid and figure out how many animals they eat a day and a year.

How many cats are in the pyramid?

20

.....

A cat can eat 4 animals a day. Multiply the number of cats in the pyramid with 4 (cats x 4)

80

.....

How many animals are eaten per year?
Multiply your answer above with 365 days

29,200

.....

Next to each native animal, list how we can save these animals from feral cats

keep cats inside
.....

make a cat run
.....

de-sex cats
.....

put up a fence
.....
