

COASTAL EDUCATION TRAILER

DISTINCTIVE AREA LANDSCAPES

The Bellarine Catchment Network facilitates over 30 school and community events per year at a variety of locations across Geelong and the Bellarine. To assist on ground education, a Coastal Education Trailer is being created to support and expand the BCN education program. This will allow BCN to include activities like snorkelling and will allow the easy storage and transport of equipment for activities like; aquascope adventures, birdwatching, weed removal, bush regeneration and beachcombs.

This trailer will enable the BCN to support and educate even more schools and community groups and will provide an education service to the entire region that is highly valued and sought after.
