Introduction

What is included in this Toolkit

This toolkit aims to help those who live, work or visit the Djilang (Geelong) and Bellawiyn (Bellarine) region to volunteer to help care for Dja, or Country.

worronkai(t)

Volunteer Groups

A barrier to volunteering may be not knowing what groups or organisations to volunteer with, or what to do. This toolkit aims to showcase many of the environmental volunteering groups and organisations in the region including summary information and contact details to help build initial connections.

Cultural Connections

Within this document are also words in Wadawurrung to help readers connect to the true cause of environmental volunteering; caring for Dja, or Country. Download the Wadawurrung language app to learn more.

Case Studies

Hear from different volunteer groups via Case Studies and find out what volunteering opportunities they have, and what makes their members passionate and keen to dedicate their time to environmental causes.

Quick Tips

Learn some essential ways to help build your own volunteering skills including how to apply for a Working With Children Check, what kind of Personal Protective Equipment you may need and what your rights are as a volunteer.

Why volunteer?

Volunteering Australia defines volunteering as "time willingly given for the common good and without financial gain". Whether you are volunteering formally (i.e., through an organisation), there are many benefits and reasons why you may want to volunteer; from building a pathway to employment, giving back, meeting new people or learning new skills. Below are benefits and/or reasons why you may want to start, or continue, volunteering.

To Care for Country

The Wadawurrung have a Connection to Culture and Country that continues to provide them with the strength to practice and pass on tens of thousands of years of knowledge. The Wadawurrung Traditional Owners live by Bundjil's lore to care for Country and all things living as their ancestors have always done. The Wadawurrung are connected to the land, skies, waterways and coastal areas. Dja, or Country, is more than a place. All of us can help to care for Dja in on way or another.

Physical and mental wellbeing

In addition to the well known benefits of volunteering to physical health, a study by Volunteering Victoria indicated that volunteering is also associated with better perceived mental health and quality of life. Participants who volunteered noted that they had better self-esteem, happiness, and satisfaction with life.

Social Connections

A strong sense of community and social connections can make working towards a common goal much more rewarding. Volunteering is a great way to build social connections in your local community, helping you to branch out to new people, find your place or get to know like-minded people or communities.

Pathways to Employment

Volunteering is a great way to learn skills that can help build pathways to employment. From environmental management techniques, time management or simply working in a team environment, volunteering can help provide you with experiences and skills that can be transferred into a paid work environment.

Volunteering is also a great way to get to know environmental groups and organisations in the area that may offer employment opportunities. Volunteering for such group or organisation is also a good way to assess if they are the right fit for you as an employer.

Wadawurrung Statement

The following statement was provided by the Wadawurrung Traditional Owners Aboriginal Corporation:

Wadawurrung People have a deep personal connection to land, waterways, animals, environment, and landscape. Our stories tell of events in time, changes in landscape, and animal movements long before today and that knowledge has been passed down for thousands of generations.

Our Dja or country is not only what you can see but also what you can hear, taste, and feel, it is our identity, our language, our people, and culture. It is our stories, ceremonies, our laws, and customs.

With our Paleert Tjaarra Dja, Healthy Country Plan, we offer an insight and a guide for our values and threats to our Dja. We invite you all to walk alongside us to make Country healthy and thrive again for future generations to enjoy, from our inland mountain and grassy plains to our coastlines and wetlands.

Wadawurrung

Types of volunteering

There are many different types of groups, organisations and programs in the environmental volunteering sector. In this toolkit, we have collated similar groups, organisations or programs into the categories below.

Coastcare Groups

Landcare Groups

'Friends of' Groups

Community Groups

Citizen Science

Quick Tips Page

Applying for a **Victorian Working With Children Check**

What is a Working With Children Check (WWCC)?

A WWCC is a screening process for assessing people who volunteer and work with children in Victoria. The check looks at criminal history and relevant prior conduct to ensure that children are protected from sexual and physical harm.

How do I know if I need a WWCC?

If your volunteering involves direct contact with children, (people under 18 years of age), you may need a WWCC. You can assess if you require a WWCC online. **Please note:** some volunteer managers will request that you acquire a WWCC, even if your contact with children is incidental (e.g., not planned). Note that employment WWCC are accepted for volunteering.

Is it free?

All volunteer WWCC are free.

How do I apply?

Visit www.workingwithchildren.vic.gov.au. If you aren't sure if you need a check, click the 'Do I need to apply for a check?' option. Otherwise, click 'Apply for a check' to begin.

The application process

- Verify your identity online using items like a drivers licence or passport.
- Verify your identity in person at a participating Post Office.
- Complete the online process.
- Lodge your application at a participating Post Office.

Visit www.workingwithchildren.vic.gov.au to apply or find out more information!

Quick Tips Page

Safe volunteering with **Personal Protective Equipment (PPE)**

What is 'Personal Protective Equipment'?

Personal Protective Equipment or PPE are items of clothing or equipment that protect you from injury or harm when working or volunteering. Typical PPE items include:

- gloves (usually gardening gloves)
- safety glasses
- long sleeves and/or pants
- enclosed shoes (e.g., boots)
- ear muffs or plugs
- high visibility vest

Do I need to wear PPE?

Almost all environmental volunteering has hazards that need to be managed. For example, weeding and tree planting can lead to cuts, scratches or splinters if gloves are not worn. Volunteer coordinators should either let you know what PPE to wear or bring, or provide it for you. PPE like long pants, long sleeved shirts or shoes are usually not provided by groups and may be your responsibility to purchase.

Where can I get PPE from?

First look through your home or belongings to check if you have already have PPE items - gardening gloves and lab glasses are often acceptable for many volunteering activities. Most volunteer organisations will provide PPE for you, however if you are required to purchase your own, your local hardware or gardening store should stock common PPE items.

Quick Tips Page

Knowing your rights as a volunteer

Photos and videos

Many volunteer groups and organisations may want to take photos or videos of you volunteering. You can either choose to give your consent, or choose not to. Note that photos that do not show identifiable features (e.g., a far away group photo, no faces) may not require your consent.

Safe and healthy environments

As a volunteer, you have the right to work in a safe and healthy environment. If you feel that you are being asked to perform tasks that are unsafe or that would require training that you have not undertaken, you do not have to perform those tasks.

Sexual harassment

Volunteers are protected from sexual harassment in the same way that paid workers are. This include sexual harassment from fellow volunteers, employers or staff and clients/customers.

Discrimination

In most circumstances, as a volunteer you are protected from discrimination under the Equal Opportunity Act 2010. This protects you from discrimination based on your gender, age, religion or race.

How to find get advice or support

If you experience sexual harassment or discrimination while volunteering, contact the Victorian Equal Opportunity and Human Rights Commission for advice.

Victorian Equal Opportunity and Human Rights Commission:

www.humanrights.vic.gov.au

Coastcare Groups

Caring for Coastal
Dja (Coastal
Country)

Coastcare Groups

Breamlea Coast Action

Breamlea Coast Action is an active group of volunteers and supporters who live or visit the small community of Breamlea. The group works to protect the unique environment of Breamlea which includes wetlands, saltmarsh, moonah woodlands, sand dunes and the estuary of Thompsons Creek.

Email: breamleacoastaction@gmail.com

Clifton Springs Curlewis Coastcare

Clifton Springs Curlewis Coastcare aims to educate and engage local community members in coastal preservation and enhancement. They focus on coastal and marine protection by participating in citizen science, educational walks and talks and more.

Email: cscecoastcare@gmail.com

Facebook: [@cliftonspringscurlewiscoastcare](https://www.facebook.com/cliftonspringscurlewiscoastcare)

Ocean Grove Coastcare

Ocean Grove Coastcare has a passion for protecting our coastline. They work closely with land managers and the community to address environmental problems, organise community education days and regular weeding activities, as well as social events such as movie nights.

Email: oceangrovecoastcare@gmail.com

Facebook: [@OceanGroveCoastcare](https://www.facebook.com/OceanGroveCoastcare)

Website: www.oceangrovecoastcare.org.au

Right: Clifton Springs Curlewis Coastcare at a community event

Landcare Groups

wiyn

Caring for Inland
Dja (Country)

Landcare Groups

Barrabool Hills Landcare

Barrabool Hills Landcare is a group of volunteers who get involved in programs such as community networking, controlling rabbits and weeds and also creating resilient landscapes and healthy waterways.

Email: barraboolhillslandcare@gmail.com

Facebook: @barraboolhillslandcare

Website: www.barraboolhillslandcare.org.au

Batesford Fyansford Stonehaven Landcare Group

Batesford Fyansford Stonehaven Landcare Group are volunteers who come together regularly to advocate and care for the natural environment. They support efforts to protect the natural environment through submissions to government bodies and public presentations on issues.

Email: info@bfslandcare.org

Website: www.bfslandcare.org

Bellarine Landcare

Bellarine Landcare aims to preserve, protect and enhance the natural environment of the Bellarine Peninsula. They manage the Bellarine Landcare and Bellarine Secondary College Nursery, have Grassland and Rabbit Action interest groups and host informative talks and weeding working bees.

Email: facilitator@bellarinelandcare.org.au

Facebook: @bellarinelandcare

Website: www.bellarinelandcare.org.au

Instagram: @bellarinelandcare

Right: Bellarine Landcare volunteers weeding along the Bellarine Rail Trail

Landcare Groups

Geelong Intrepid Landcare

Geelong Intrepid Landcare is a team of young adventurous volunteers (late teens to 30's) who travel around assisting different groups with adventure conservation projects. Join in on field trips, workshops and working bees.

Email: geelongintrepid@gmail.com

Facebook: @GeelongIntrepidLandcare

Website: www.geelonglandcarenetwork.org.au/geelong-intrepid-landcare

Geelong Landcare Network

Geelong Landcare Network is a networked community of Landcare and Friends groups encompassing an area to the west and north of Geelong. The GLN host many events including seed and nest box building workshops, informative talks and workshops and citizen science activities.

Email: geelonglandcarenetwork@gmail.com

Facebook: @GeelongLandcareNetwork

Website: www.geelonglandcarenetwork.org.au

Little River Community Landcare

Little River Community Landcare aims include improving the health and accessibility of Little River and enhancing indigenous flora and fauna. Volunteer opportunities include working bees, promoting awareness of the environment and providing information and advice on environmental management. There are numerous roles to help with the administration of the group and promotion of activities.

Email: littleriverlandcare@outlook.com

Facebook: @LittleRiverCommunityLandcare

Website: www.littleriver.vic.au/little-river-community-landcare

Surf Coast Inland Plains Network

SCIPN is a Landcare Network operating along the Surf Coast from Barwon Heads to Anglesea and within the inland plains between Connewarre, Lake Modewarre to Winchelsea. SCIPN facilitate and are involved in a variety of projects; from platypus citizen science, tree planting in a variety of habitats, focus groups and more.

Email: scipn@bigpond.com

Website: www.scipn.com.au

'Friends of' Groups

All of Country
is connected

'Friends of' Groups

Friends of the Barwon

Friends of the Barwon is a catchment wide network of groups and individuals working to protect and restore the long-term health of the Barwon River and its tributaries. Friends of the Barwon have volunteering opportunities in social media, administration and advocacy.

Email: friendsofthebarwon@gmail.com

Facebook: @FriendsoftheBarwon

Website: www.friendsofthebarwon.org.au

Friends of the Basin Reserve

The Friends of the Basin Reserve work to protect and enhance the Basin Reserve in Drysdale. The group meet at the Bellarine Landcare and Bellarine Secondary College Nursery each month to undertake weeding and citizen science activities.

Email: facilitator@bellarinelandcare.org.au

Friends of Begola Wetlands

The Friends of Begola Wetlands is a community group that aims to protect and enhance the environmental values of Begola Wetlands in Ocean Grove.

Email: info@bcn.org.au

Left: The Basin Reserve, Drysdale

'Friends of' Groups

Friends of the Bellarine Rail Trail

The Friends of the Bellarine Rail Trail are an incorporated environment group formed in April 2002. The group is committed to the indigenous revegetation of the 16-kilometre section of the Bellarine Rail Trail, between South Geelong and Drysdale Railway Stations.

Email: friendsofbellarinerailtrail@hotmail.com
Website: www.sites.google.com/site/friendsbrt

Facebook: @FriendsOfTheBellarineRailTrail

Friends of the Bluff

Friends of the Bluff is a group of committed environmentalists providing support, education and awareness for the regeneration of natural vegetation and habitat of the Barwon Bluff area. They offer volunteering opportunities in social media, administration and community engagement.

Email: info@barwonbluff.com.au
Website: www.barwonbluff.com.au

Facebook: @FriendsoftheBluffBarwonHeads

Friends of the Brisbane Ranges

The Friends of Brisbane Ranges is an active group which began in 1982. They provide opportunities for people to meet socially and learn about the environment, ecology, flora, fauna, and history of the Brisbane Ranges National Park and Steiglitz Historic Park in Victoria.

Email: friends.brisbane.ranges@gmail.com
Website: www.fobr.org.au

Facebook: @fobrnp

Right: The Bluff,
Barwon Heads

'Friends of' Groups

Friends of Buckley Falls

The Friends of Buckley Falls group are involved in revegetation and weeding on both sides of the Barwon River (Fyansford, Highton and Wandana), including Redgum Island between the Barwon and Moorabool Rivers. Follow the group on Facebook to find out about their regular working bees.

Facebook Group: Friends of Buckley Falls

Friends of the Buckley Park

The Friends of Buckley Park are a community group that works in the coastal reserve between Ocean Grove and Point Lonsdale. Projects include education and awareness of the local community, weed control and revegetation projects.

Email: admin@inheritearth.com.au

Friends of Cowies Creek

The Friends of Cowies Creek is a community group in Norlane that foster care for Cowies Creek by connecting with the local community to protect and regenerate the creek and its native biodiversity. They host clean-ups, plantings and other creekly events with the local community.

Email: friendsofcowiescreek@gmail.com

Facebook: @Cowiescreek

Website: www.northerlyaspects.org.au/friends-of-cowies-creek/

Left: Buckley Falls, Geelong

'Friends of' Groups

Friends of Edwards Point

The Friends of Edwards Point aim to protect the last remaining stand of coastal woodland on the Bellarine Peninsula. From coastal woodlands to a magnificent coastline, the reserve is home to a vast array of indigenous plants and animals.

Email: friends.edwardspoint@gmail.com

Facebook: @friendsofedwardspointwildlifereserve

Friends of the Geelong Botanic Gardens

The Friends of the Geelong Botanic Gardens have been an integral part of the Geelong Botanic Gardens for 29 years and offer an array volunteering opportunities including gardening, maintaining the nursery, helping with the library or as a volunteer guide.

Email: info@friendsgbg.org.au

Facebook: @FriendsoftheGeelongBotanicGardens

Website: www.friendsgbg.org.au

Instagram: friendsgeelongbotanicgardens

Friends of Indented Head Woodland Nature Reserve

The Friends of Indented Head Woodland Nature Reserve began in 2019 and they have worked closely with the City of Greater Geelong's Nature Reserves Team. The group meet for working bees on the 1st Friday and 3rd Wednesday of the month and last for about two hours.

Email: inov@bigpond.net.au

Friends of the Hooded Plover Bellarine

The Friends of the Hooded Plover Bellarine are a group of volunteers who work in partnership with Birdlife Australia throughout the year to raise awareness and protection for this threatened bird.

Email: fohp_bellarine@birdlife.org.au

Website: www.birdlife.org.au/projects/beach-nesting-birds

'Friends of' Groups

Friends of the Hooded Plover Breamlea

The Friends of the Hooded Plover Breamlea monitor four regular breeding pairs along the stretch of coast from Black Rock to the Point Impossible estuary. They work with Friends groups on the Bellarine and the Surf Coast Shire, as Hooded Plovers are found on surf beaches right along our coast.

Email: julpetsimzac@hotmail.com

Website: www.birdlife.org.au/projects/beach-nesting-birds

Friends of the Lobster Pot

The Friends of the Lobster Pot are located along the Barwon estuary in Barwon Heads and they work together to manage the educational material in the Barwon Estuary Heritage Centre, also known as the Lobster Pot.

Email: martin@barwonheads.net

Friends of Mud Islands

The Friends of Mud Islands is a non-profit, volunteer group established in December 1992 to assist in the care, maintenance and preservation of the then Mud Islands State Wildlife Reserve.

Email: fomislands@yahoo.com.au

Facebook: [@friendsofmudislands](https://www.facebook.com/friendsofmudislands)

Left: Barwon Heads

'Friends of' Groups

Friends of the Marine and Freshwater Discovery Centre

The Friends of the Marine and Freshwater Discovery Centre is a group of people dedicated to promoting and supporting the Marine Discovery Centre as an environmental learning centre of local, national and international significance.

Email: membership@friendsofmdc.org

Facebook: [@marinediscoverycentrefriends](https://www.facebook.com/marinediscoverycentrefriends)

Friends of the Ocean Grove Nature Reserve

The Friends of Ocean Grove Nature Reserve work to educate the public about the Ocean Grove Nature Reserve's fauna, flora and habitat and assist in weed control, planting, protection of vulnerable plants and maintenance of the visitor centre.

Email: fognr@gmail.com

Website: www.fognr.wordpress.com

Facebook: [@FriendsoftheOceanGroveNatureReserve](https://www.facebook.com/FriendsoftheOceanGroveNatureReserve)

Friends of Point Richards Flora and Fauna Reserve

The FoPR help protect and restore the biodiversity of Point Richards which features ephemeral wetlands and a wide diversity of coastal woodlands and wetland bird species. The group meet every Tuesday morning at 10 am for a 2-hour working bee and are supported by Bellarine Bayside.

Email: contactus@bellarinebayside.com.au

Facebook: [@FriendsofPtRichards](https://www.facebook.com/FriendsofPtRichards)

Right: Growling Grass Frog found at Point Richards

'Friends of' Groups

Friends of Ramblers Road

Friends of Ramblers Road are involved in community and social functions. The group has weeding days, is involved in Clean Up Australia Day and has so far planted approximately 300 small shrubs on the Ramblers Road foreshore area.

Email: friendsoframblersroad@gmail.com

Friends of Waurm Ponds Creek

The Friends of Waurm Ponds Creek gather together to care for Waurm Ponds Creek from Colac Road to Barwon Heads Road. They facilitate activities including revegetation, maintenance and clean ups.

Email: fowpc@y7mail.com

Website: www.friendsofwaurnpondscreek.org.au

Facebook: [@friendsofwaurnpondscreek](https://www.facebook.com/@friendsofwaurnpondscreek)

Friends of Yellow Gums Reserve

The Friends of the Yellow Gums Reserve is a newly forming community group that aims to raise awareness about threatened Bellarine Yellow Gums. Events may include flora and fauna walks, revegetation days and private land conservation education and advice.

Email: info@bcn.org.au

Left: The threatened Bellarine Yellow Gum, Ocean Grove

Case Study

Friends of the Ocean Grove Nature Reserve committee member Beth Ross

What draws people to your group?

Many photographers and birdwatchers come to enjoy the large reserve of pristine woodland. It is quite accessible being in the centre of Ocean Grove and features many types of walks. Visitors can see lots of wildlife - from wallabies, echidnas and birds. The friends group is very welcoming and includes a lot of members with high expertise that others can learn from.

What volunteering opportunities do you offer?

FoOGNR facilitate activities including revegetation, weeding and specialised projects like the new Bellarine Nature Search website. Volunteers can also help with the newsletter, social media, plant sales, community engagement, as well as volunteering to be a committee member.

What skills do volunteers need?

No specialised skills are needed - the group are able to find a role or activity for everybody. Volunteers do need a Working With Children Check.

How can they best get in touch?

Email us at fognr@gmail.com. If you sign up as a member, you receive the quarterly newsletter. Visit the website at www.fognr.wordpress.com for more info.

When do you meet?

The group meet for regular working bees on the second last Friday each month at 9am-11:30am. Register via [ParkConnect](#) or contact the group directly.

Citizen Science

Citizen Science

BeachWatch

This program is facilitated by Bellarine Bayside and aims to engage the community in monitoring changes along the northern Bellarine coastline. Using survey equipment, volunteers measure sand losses and gains along the northern Bellarine coast every 2 months.

Email: contactus@bellarinebayside.com.au

Facebook: @FriendsofPtRichards

Website: www.bellarinebayside.com.au/coastal-management/volunteers/

EstuaryWatch

EstuaryWatch supports community members to actively participate in estuary health monitoring and provides a pathway for community members to increase their knowledge about estuaries through regular seminars, information days and training.

Email: ghcma@ghcma.vic.gov.au

Website: www.estuarywatch.org.au

Facebook: @EstuaryWatchWaterwatchVic

Greater Geelong Plastic Pollution Survey

Join the world's largest plastic pollution citizen science survey lead by the prestigious CSIRO Marine Debris Team and facilitated by Bellarine Catchment Network across Geelong and the Bellarine Peninsula. This program helps us better understand the sources, movement, distribution and impacts our waste can have.

Email: info@bcn.org.au

Facebook: @bellarinecatchmentnetwork

Website: www.environmentbellarine.org.au

Right: Bellarine Catchment Network volunteers learning how to participate in the Greater Geelong Plastic Pollution Survey

Citizen Science

Great Victorian Fish Count

The Great Victorian Fish Count is facilitated by the Victorian National Parks Associations and runs every November and December and hundreds of divers and snorkelers plunge contribute to this exciting citizen science event. Volunteers record species on a dive slate and this data helps us understand more about Victoria's marine species.

Email: vnpa@vnpa.org.au

Facebook: @thegreatvictorianfishcount

Website: www.vnpa.org.au/programs/great-victorian-fish-count

Point Lonsdale Sand Monitoring Program

Learn how to monitor sand erosion and accretion at Point Lonsdale front beach. Volunteer at your own pace and as frequently as you wish, using equipment that is stored at a shared location for ease. All volunteers will be trained in sand monitoring techniques and will operate as a group.

Email: info@bcn.org.au

Facebook: @bellarinecatchmentnetwork

Website: www.environmentbellarine.org.au

Sea Search

The Sea Search program is facilitated by Parks Victoria and is a great way to learn and explore the marine environment while collecting important information on its health and condition. The information collected by Sea Searchers aids the management of marine parks. There are a range of activities to suit all experience levels. Sea Search activities occur both on shore and in the water.

Email: seasearch@parks.vic.gov.au

Left: Point Lonsdale Sand Monitoring volunteers measuring sand height at Point Lonsdale front beach.

Citizen Science

Sea Slug Census

The Sea Slug Census group was established by the Victorian National Parks Association to allow participants in the Sea Slug Census program to add images of their finds and view those made by other divers. There is usually a spring census that volunteers can participate in, whether you are on the rockpools, snorkelling or diving.

Email: nicole@vnpa.org.au

Website: www.vnpa.org.au/programs/sea-slug-census

Facebook: [@seaslugcensus](https://www.facebook.com/seaslugcensus)

Victorian Coastal Monitoring Program

Deakin University are working with motivated citizen science groups to use aerial drones to monitor shorelines across Victoria. They monitor changes in the volume, topography and extent of beach sands and foreshore morphology and all data is available to the community.

Waterwatch

Waterwatch Victoria in the Geelong and Bellarine region is facilitated by the Corangamite Catchment Management Authority, and is a citizen science program that monitors waterway health. They also collect data through surveys and observations on local waterway quality and health.

Right: Waterwatch monitors water quality at lakes, rivers and other water ways across Victoria.

Case Study

Geelong Field Naturalists Club

member Rod Lowther

What citizen science programs are the GFNC involved in?

We are involved in the 'Global Big Day' a twice-yearly bird surveying challenge that users complete via the [eBird](#) app.

Using the [iNaturalist](#) app, we participate in the City Nature Challenge in autumn, an international competition that helps define Geelong biodiversity by observing life during the four-day event. In spring, we participate in the Great Southern BioBlitz which has the same format as above but is for southern hemisphere cities only. For all events, anybody can join in, you just need to use the appropriate citizen science app.

While eBird is for bird observations only, iNaturalist can record observations from all species - plants, birds, insects, shells. When recording nature using these apps, you can do so with a friend or with a group. These citizen science projects involve both collaboration and competition and are a good way to give you a snapshot of nature in your local area. If you join as a GFNC member, the club also participates in summer and winter wader counts including Latham's Snipe count in summer, as well as regular fauna surveys.

Why are these programs important?

These programs give people a chance to start observing and becoming aware of what's around them, leading to a better understanding and appreciating of nature. The data collected adds to our overall knowledge of biodiversity which can influence the decision-making processes around land management and species protection.

What skills do volunteers need?

You don't need to be an expert at all. In the case of iNaturalist, it has inbuilt Artificial Intelligence backed up with the support of specialists who will assist with identification. It's a great learning tool and the GFNC has several species guides for common species in the area that you can use to learn more - visit our ['BioBlitz'](#) page to have a look.

How can people participate?

When using eBird, all you need to do is create an account and enter your bird observations. For iNaturalist simply create an account, join specific projects if you would like, such as the GFNC BioBlitz project. Join the GFNC as a member or follow the GFNC Facebook for events at @geelongfnc. Members can join in on citizen science excursions and activities. Other apps that allow you to contribute to citizen science include [FrogID](#), [Butterflies Australia](#) and [FeralScan](#).

The [Vic Field Guide](#) is a good app to help you identify animals.
