

GARDENS FOR WILDLIFE

DISTINCTIVE AREA LANDSCAPES

Gardens for Wildlife (G4W) is a network of community groups and councils supporting each other to involve local residents, schools, and businesses in caring for the indigenous plants and animals of our communities. We have previously ran a pilot project for Gardens for Wildlife in Ocean Grove to great success. We are now investing in a longer term project in partnership with the City of Greater Geelong for multiple townships. More updates will be available via our social media pages.

This program is a great way to learn about biodiversity and to do your bit in your own garden. Each participant will receive a garden visit and expert advice on things like; ideal plant species, weeds they can remove, where to place insect hotels or logs for reptiles and ways to encourage local birds.
