

Wreck 2 Reef Swim and Caring For Our Bays Report

The 10th annual Wreck 2 Reef swim was supported by Bellarine Catchment Network and Caring For Our Bays Program. This year education on the marine and intertidal values was again highlighted. A significant addition to the program was the introduction of reusable mugs for all swimmers post the swim.

This saved around 500 single use plastic cups. Our keep cups were once again used at the coffee stand and continue to be very popular saving around 200 single use coffee cups.

Left: Sarah and Fiona finish the swim “so good to have these re-usable mugs, great initiative, congratulations, we love it”

Right: John and Matt showcase some Indented Head marine and tidal species
