

Red-necked Stint

Dirk-warrabil koom

Of the 37 migratory birds who visit Australia, Red-necked Stints are the smallest Ramsar bird species, weighing just 27g, being not much bigger than a box of matches.

Super Flyers

They fly 25,000 kilometres between Australia and Siberia/Alaska every year and land at 'staging sites' along the journey to rest and refuel. Source: Birdlife Australia

Be a local hero

Put your rubbish in a bin

How Can I Help?

- ✓ I need space! Keep 20m away from shorebirds so they can eat and sleep in peace
- ✓ Keep dogs on leads
- ✓ Protect my home! Don't walk or drive through vegetation
- ✓ Download BirdLife's Birdata app to report sightings

Wadawurrung Cultural Heritage Fact

Wadawurrung people lived by a six season cycle and could observe changes in resource availability. migratory species indicate a change in the seasons.

Help us to protect our unique local species, keep Geelong and the Bellarine clean.
