# MORE INFORMATION

2024 January summer program

## Beachcombs

Have you ever wondered what those horse-shoe shaped jelly things are? If sharks lay eggs? Why there are different coloured seaweeds? These questions and more will be answered by Bellarine Catchment Network at this free, family-friendly beachcomb activity. You will walk along the beach looking for creatures and treasures and will find out about our local amazing marine life!

## Coastal Discovery Stall

Visit the Coastal Discovery Stalls at Barwon Heads, Breamlea and Ocean Grove this January to explore the wonders of the coast - from the local Hooded Plovers, the creatures found in our rockpools as well as how to get involved in local environmental groups. Explore the table-top beachcomb, pick up some brochure so or do a colouring in!

## Enviro Stall

Visit Bellarine Catchment Network at these Enviro Stalls at Eastern Beach this January to learn more about nature, our local plants and animals, waste and recycling. Explore the table-top beachcomb, play our recycling game to win a prize or do some colouring in! The stall will also feature brochures and booklets about wildlife and local plants.

These events are made available through support from:
